## WITH SIX SIDES OF SERVICE.

**DR. KENNETH FINE** is an academic medical doctor, board certified in internal medicine and gastroenterology, and internationally recognized for his nutritional research and scientific publications ([intestinalhealth.org/CV](http://intestinalhealth.org/CV)). He has been professionally involved in patient care, medical research, teaching, directing clinical laboratories, nutritional pioneering, and public health for over 25 years. Having been a professor his entire working life, in the year 2000, he converted his successful academic medical career into a public service enterprise to foster his professional passions for teaching and helping

people. It was then that he founded, and he still directs [EnteroLab.com](http://EnteroLab.com) clinical reference laboratory and the non-profit Intestinal Health Institute in Dallas, Texas ([www.intestinalhealth.org](http://www.intestinalhealth.org)), where he has furthered his ground-breaking research and offers diagnostic laboratory tests for intestinal disorders, and gluten and other food sensitivities.

In his musical persona, **KENNY DAVIN FINE** is a passionate singer-songwriter, guitar-harmonica player, and spiritual journeyman who entertains, educates, and enlightens with his original, professionally-recorded music. Combining lyrical mastery, vocal smoothness, and the musical sounds of classic rock, country rock, and blues, Kenny has created a sound noteworthy for both its ear friendliness and its spirit-touching quality. His current music release recorded in Memphis, TN called "Memphis Rising" consists of what he calls "Rock 'n Blues... For Goodness' Sake!"

Along with his achievements as a musician and prolific tunesmith, the good doctor is also a wonderful performer. He showcases his "Healing Voice" in both his live musical shows and his awe-inspiring lectures. He is the country's only "Physician-Musician on a Mission" ([www.kennydavinfine.com](http://www.kennydavinfine.com)).

Traveling the country "Speaking and Singing for Your Health, Happiness, and Hope" is his mission. As such, Fine uses the stage not only to educate the public about his scientific breakthroughs or the importance of proper diet and nutrition for overall health, but also to share his philosophies on physical, mental, emotional, and spiritual well-being in what he calls "The Higher Truth of Health." His trademark "musical lecture" is truly Singing for Healing! It's a unique combination of original wisdom and music imparting what he acronymizes as GLITCH (goodness, love, inspiration, truth, creativity, and healing) with the perfect balance of information and the healing power of music.

As child-friendly "Dr. Ken the Produce Man", Dr. Fine has authored a multimedia musical children's health and nutritional program called "Get on a Mission of Nutrition" ([GOAMON.org](http://GOAMON.org)) to address childhood obesity, and impart overall health, and positive attitude and values in kids.

## FOR YOUR HEALTH,

## HAPPINESS AND HOPE!

## SCIENCE-MEDICINE INNOVATION

As a board-certified internal medicine M.D. and gastroenterologist, as a medical researcher and

## & NUTRITION

clinical laboratory director, as a nutrition and food sensitivity expert, and as an internet medicine pioneer, Dr. Kenneth Fine has been a trailblazer and a true innovator. Utilizing original patented technology, he forged his path of medical public service in 2000 with, among other things, an online clinical laboratory for intestinal health called EnteroLab.com (Entero- means intestinal in Latin) and one of the first-ever free public medical informational websites called FinerHealth.com. Both of these websites still function fully in these purposes today. It was this dedication to both public health service and technological innovation that led Dr. Fine in 2000 to leave his 15-year post in academic medicine to commit himself to a full-time professional life of public Health, Happiness, and Hope, for adults and children alike.

## PUBLIC HEALTH EDUCATION

It was also in 2000 that Dr. Fine founded the IRS-approved, 501(c)(3) Intestinal Health Institute

(IHI), a Non-Profit Public Health and Educational Institute, serving as its Director from inception to date. Dr. Fine was one of the first medical doctors to launch

such an institute for the purpose of facilitating medical research, while bringing the practical applications of that research directly to the public in both on-line campaigns (at IntestinalHealth.org), and live conferences and

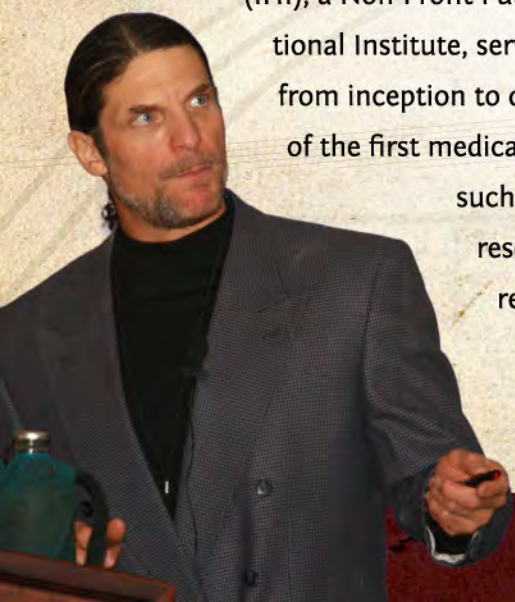

seminars, such as the highly acclaimed "The Gluten Truth meets The Circle of Life". The IHI is the backbone of Dr. Kenny Davin Fine's passionate and compassionate presence as a Public Health Educator. (Despite his multifaceted professional roles, if you ask Dr. Ken what his job is, he will answer "I'm a Public Health Educator.")

## ORGANIC SUPERFOOD SOLUTIONS

As the organizer and executor of neighborhood organic food co-ops for more than a dozen years, and with an organic SuperFood web site called TheOrganicAlternative.com, Dr. Fine has another opportunity to share the Goodness, and to preach what he practices.

"Let Food Be Thy Medicine" was an ancient dictum that Kenny still upholds today, both in his personal life and in this part of his health service profession. It is the mission of The Organic Alternative to not only bring to the public "Better Food at Lower Prices", but also to encourage people to make healthier food choices when choosing alternatives to Western dietary staples like flour and dairy, and to deliver credible health information along with healthier food. The Organic Alternative is thus "Real Health Food from Real Health Professionals"! He and his nutritionist staff not only educate us on what foods to eat, but Dr. Fine additionally executed his inventive mind and life-long experience as a healthful eater in the development of his own line of nutritional products, most of which are derived from an organic blueberry farm with which he is associated. He additionally brings the value of these products and food to his communities through his conferences and educational programs, as well as in his own neighborhood organic food co-op.

## THE HEALING VOICE – MUSIC WITH A PURPOSE

Perhaps at the very core of Kenny Davin Fine is his love for music and his desire to ignite the heart-lights in everyone he meets with his music, words, and song lyrics. A singer/songwriter, Kenny writes

and records what he deems “Music with a Purpose: to Entertain, Educate, and Enlighten.” Most recently, he has furthered the missionary function of his music with a social program to “Musically Inspire Goodness... For Goodness’ Sake”, based on the message and lyrics of one of his inspirational songs, “The Circle of Life (There’s no Time to Waste)”.

This program, called “Be the Circle” (bethecircle.org), encourages us all to smile on one another, share our Light with one another, and inspire each other to be as successful and healthful as we can be. Kenny has developed a concept based on “11 Points of Light of the Circle of Life”, exacting just how this can be done without and within. Knowing that his mission on earth is to bring Health, Happiness, and Hope to the world, and realizing that within the word “Health” is

“Heal”, Kenny has truly connected with his “Healing Voice.”

lifestyles. “Get on a Mission of Nutrition”, which is geared to grade schoolers and their parents, teaches kids about nutrition and healthful living in a fun, easy-to-learn way. The audio music CDs, music-video DVDs, and written material promote and educate on: nutrition and health-awareness; the importance of exercise and eating right; the anatomy and physiology of digestion; the importance of staying away from tobacco, alcohol and drugs; and fostering the development of positive attitudes and values. To make learning as fun as possible for the children, the campaign centers on music that Dr. Fine has written and professionally recorded that promotes these ideas to the kids. A professionally prepared curriculum helps 4th grade teachers (or parents at home) enact these lessons.

## SPIRITUAL HEALTH INITIATIVE

As a Spiritual Journeyman and a true man of G-d, Dr. Ken travels the country inspiring and spreading goodness and spiritual health. Forming the current core of this Spiritual Health Initiative are his inspirational lectures and musical lectures as part of what he calls

“The Higher Truth of Health”, and his active plans for The ReGenesis Center, a Spiritual Health and Healing Center providing educational programs and recreational activities in a beautiful natural setting where people can Re-Create, Re-Juvenate, Re-Orientate, and Re-Treat... ReGenesis. For the past several years, Kenny has applied the title of one of his best known inspirational music CD’s as the namesake of his Spiritual Initiative, “For Want of Higher Ground”. Time has shown, and will continue to tell that Kenny Davin Fine has reached a Higher Ground of Spiritual Consciousness, and he’s still climbing.

## CHILDREN’S HEALTH CURRICULUM

Kenny Davin Fine is a concerned father not only to his daughter but to all the children of the world, and it is this concern that has been a driving force in the creation and dissemination of his musical children’s health program called “Get on a Mission of Nutrition” (GOAMON). Dr. Fine has incorporated his passion and

professional singing and songwriting musical skills into this multimedia public educational campaign that teaches children healthier
